

Quick Reference Publishing takes pride in the presentation and easy access of our product. Our guides are designed to fit in your pocket or backpack. QRP guides are laminated, waterproof and durable so you can take them anywhere you want to go!

We have assembled some of the world's finest nature photographers who have dedicated their lives to recording and capturing these indigenous species in their habitat.

All our guides are written to be scientifically accurate and we maintain that they should be easy to read and understand to make them accessible to everyone.

AdventureKEEN works to connect you with your local market by publishing books that help everyone appreciate the outdoor world. We aim to give readers healthy, fun ways to engage with local parks, trails, rivers, and more. This improves the lives of readers, nature lovers, and independent retailers, fostering a reverence for nature and a protective mindset toward maintaining our green spaces and wild places for future generations.

# Wild Bird Christmas Tree

## *Birds of your State Design*

The Heritage behind the Fisher Wildlife division of Songbird Essentials - Each piece is carefully cast from the original carving by Randy & Elaine Fisher, and are painted under the artist's supervision. The Fishers, from Cape Cod, Massachusetts, are award winning carvers and have devoted the past twenty years to carving realistic birds.

The Gift Essentials handmade, blown glass ornament line was founded by Margaret Cobane. She has been designing blown glass ornaments for 20 years.

Margaret designs the ornaments and a chosen artisan first creates a sculpture which must be approved by Margaret before a glass mold is made. From Margaret's color design another factory artisan hand paints the glass mold, to create the original blown glass ornament sample. These are then hand blown and painted by talented craftsmen who have learned that the Cobane painted ornaments are the most lifelike and accurate wild birds and animals (as well as fun Holiday Presents) available in the world.

The resulting birds have graced the cover of the National Wildlife Federation Catalog for many years. Margaret continues to create the new designs for Gift Essentials.

BrushArt™ animals are the “Original – Real Buri”. Originally sourced from villagers in the Philippines by Vera and John Whalen. We still source the Brush Art Products from the same village.

Each BrushArt™ creation is hand made from the most superabundant and self-regenerating of natural materials. Most important to a BrushArt™ animal is the buri sugar palm. This tall palm tree, common throughout the Philippines, has many uses: but it is the long, thick leaf stems that provide the fiber from which the body of a BrushArt™ animal is made.

BrushArt™ animals make delightful and imaginative gifts. You can bend them into different lifelike positions—just hold firmly between your palms and twist!

Create a breathtaking product display with birds of your state hand-picked by our birding experts and designed for your location.

We offer over 100 wild bird ornaments from the Cobane, Fisher Wildlife and BrushArt™ by Gift Essentials collections which cover all artistic preferences and budgets.

Customers will love creating their own tree featuring birds they have seen in their very own backyard. Advanced birders will enjoy going beyond their backyard and adding the rare and uncommon birds they have spotted.

Add Field Guides, Pocket Guides, and Playing Cards to enhance the selling opportunity.

NOW is the time to plan for Christmas 2020!  
Let me put a package together for you.
